Nakład 500 egz. Ark. wyd. 9,0. Ark druk. B3 15,0. Pap. offsetowy 80g.
Oddano do składania we wrześniu 1992 r. Preprint ukończono w grudniu 1992 r. Druk ukończono w kwietniu 1993 r.

Oprawa Spółdzielnia Inwalidów „Przyszłość” w Bielsku Podlaskim

WSTĘP

Obecny zeszyt Księgi ukazuje się z opóźnieniem i zawiera materiały za okres 5 lat. Kolejny zeszyt – za 1992 rok – ukaże się w 1993 roku. Następne będą wydawane w ustalonym rytmie tak, aby do połowy następnego roku hodowcy otrzymali zeszyt za rok poprzedni.

Staraniem prof. Aleksandra W. Sokołowskiego – ówczesnego dyrektora Białowieskiego Parku Narodowego – Redakcja Księgi Rodowodowej Żubrów powróciła w 1991 r. do Białowieży. Zmianie uległ skład osobowy Redakcji. Podejmując, po długiej przerwie i w nowych warunkach, obowiązki Redaktora Księgi pragnę wyrazić nadzieję na odnowienie ścisłej współpracy właścicieli i hodowców żubrów z Redakcją oraz zaoferować pomoc w realizacji wspólnych zadań, związanych z ochroną i restytucją żubra na świecie.

Redakcja dysponuje aktualnym bankiem danych z zakresu ewidencji rodowodowej światowego stada żubrów. Na życzenie hodowców dane rodowodowe określonych osobników mogą być udostępniane w formie wydruków. W przyszłości planujemy, dzięki posiadanej bazie danych i specjalnemu oprogramowaniu, służyć fachowym poradniectwem w zakresie doboru zwierząt do rozplodu w taki sposób, aby służyło to utrzymaniu zasobów genowych gatunku i obniżaniu stopnia inbredu stada.

Wszystkich właścicieli i hodowców żubrów czystej krwi prosimy o utrzymywanie stałego kontaktu z Redakcją, informowanie na bieżąco o urodzeniach, padnięciach i przesiedleniach zwierząt oraz o nadsyłanie rocznych raportów o zmianach w stanie posiadanych żubrów. Po otrzymaniu informacji o urodzeniu żubra (wraz z danymi rodowodowymi) Redakcja będzie przydzielać numery rodowodowe na bieżąco. Informacje można przesyłać listownie na adres Redakcji lub faxem na nr: 885-859-12323.

W okresie objętym rejestracją niniejszego zeszytu dokonały się przemiany polityczne w Europie, zmieniające przynależność państwową niektórych hodowli. Ponieważ zeszyt obejmuje okres kilku lat, zaś zmiany dokonywały się w różnym czasie, zachowano dotychczasowe uszeregowanie hodowli w byłym ZSRR. Natomiast w tabelach stanu (*Światowy stan..., Spis wszystkich żyjących żubrów...*) wprowadzono informację o obecnej przynależności państwowej danej hodowli oraz nowe nazwy

hodowli, jeśli uległy zmianie. Nowe nazwy wprowadzono też w *Alfabetycznym spisie hodowli* na końcu zeszytu. Dążeniem Redakcji jest nawiązanie bezpośrednich kontaktów z hodowcami z Europy Wschodniej z nowo powstałych niepodległych państw, leżących wcześniej w granicach ZSRR. Hodowle niemieckie, należące uprzednio do byłego NRD i Berlina Zachodniego, umieszczone w tabelach stanu w Republice Federalnej Niemiec, zaś w tabeli urodzeń i zmian podano przynależność państwową stosownie do daty zjednoczenia Niemiec (1990.10.03).

Okres przerwanych kontaktów z Redakcją Księgi stał się zapewne jedną z przyczyn powstania wielu trudności z ustaleniem losów niektórych żubrów. Usilne starania nowej Redakcji nie doprowadziły do wyjaśnienia wszystkich luk i wątpliwości. W przypadku braku aktualnej informacji hodowle oznaczono gwiazdką w zestawieniach stanu, zaś podane liczby zwierząt nie są dokładne. Jeżeli Redakcja nie uzyska szybko wystarczających informacji, hodowle te zostaną usunięte z ewidencji w następnym zeszycie. Tym samym żubry z tych hodowli utracą dane rodowodowe i nie powinny być wprowadzane do hodowli żubrów czystej krwi. To samo odnosi się do zwierząt zakupionych przez pośredników, którzy nie odpowiadają na pisma Redakcji lub też nie są w stanie udzielić dokładnych wyjaśnień co do losu żubrów, którymi handlują. Dotyczy to następujących firm: Bayreuth, Hohenstadt i Krechting w Niemczech, Laval w Kanadzie, Raillencourt-ste-Olle we Francji, Tokyo A.Ch. Co. i Tokyo K.B.A.T. Co. w Japonii.

Rozwój hodowli żubrów na świecie doprowadził do powstania nowej formy hodowli – hodowli półwilnych (semi-free breeding centre). W hodowlach półwilnych żubry rodowodowe przebywają w dużych zagrodach, a hodowcy tracą możliwość identyfikacji poszczególnych osobników, a czasem także ustalania dat urodzeń i śmierci, z reguły zaś danych rodowodowych cieląt. Hodowle takie postanowiono od bieżącego numeru wyróżniać znakiem „♦” i przeniesiono je z tabeli *Spis wszystkich żyjących żubrów...* do tabeli *Światowy stan...*, gdzie figurują jedynie dane liczbowe. Warunkiem ujęcia takiej hodowli w Księdze jest pisemna gwarancja hodowcy o czystości hodowli pod względem gatunkowym. W tym zeszycie sytuacja ta dotyczy trzech hodowli: PRESLAV i VODEN w Bułgarii oraz GURLEY w USA.

W szczególnych przypadkach żubry czystej krwi mogą tracić identyfikację rodowodową i zostają zakwalifikowane jako BISON BONASUS. W niniejszym zeszycie dokonano tego w stosunku do żubrów przesyłanych z ZOO Barcelona do ZOO Lisboa w dniu 1980.05.09. (tabela *Uzupełnienia i poprawki...*). ZOO Barcelona nie było w stanie zidentyfikować wysłanych zwierząt, gwarantuje jednak pisemnie ich czystość gatunkową.

W praktyce hodowlanej powtarzają się sporadycznie przypadki włączania żubrów czystej krwi z hodowli wolnych, rejestrowanych w Księdze, do hodowli zagrodowych. Żubry takie są oznaczane obecnie znakiem graficznym „♂” i odnotowywane w tabeli *Urzędowy rejestr...*, odpowiedniej dla roku włączenia. W każdym przypadku takiego przesiedlenia Redakcja żąda od hodowcy potwierdzenia na piśmie czystości gatunkowej takich żubrów.

Dane ilościowe z hodowli wolnych nie zawsze są kompletne. W bieżącym numerze dane z hodowli BIESZCZADY nie obejmują żubrów, które przekraczają granicę i przechodzą na teren Słowacji i Ukrainy. Współpraca międzynarodowa pozwoli uściślić te dane w przeszłości.

Redakcji nie udało się nawiązać kontaktu z nowymi hodowcami, do których trafiły żubry rodowodowe czystej krwi. Są to następujące hodowle: Belo Horizonte (Brazil), Bogota (Columbia), Circus Kaiser, Dinkelsbuhl, Harry Althoff, Stendal i Winningen (German Federal Republic), Györ i Jaszberenyi (Hungary), Ideasa (Spain). Wszystkich, którzy mogą pomóc Redakcji prosimy o podanie adresów tych hodowli.

Jan Raczyński

INTRODUCTION

The present issue of the Pedigree Book appears with some delay and comprises data for the last 5 years. The next issue – the one for the year 1992 – will be published in 1993. The next ones will appear regularly, so that the breeders will receive the issue for the last year before the first half of the next one is over.

Thanks to the efforts of Professor Aleksander W. Sokołowski – the director of the Białowieża National Park at that time – the Editorial Office of the European Bison Pedigree Book was brought back to Białowieża. The editing staff has also been changed. Therefore having resumed – after a long break and in the new conditions – the duties of the Editor – I would like to express my hope for the renewal of the close co-operation between the European bison breeders and owners and the Editorial Office as well as to offer our help in the realisation of our mutual task concerning the protection and restitution of the European bison throughout the world.

We are in the possession of the current computer data base concerning the pedigree of the European bison herd throughout the world. At the breeders demand the pedigree of a particular specimen may be supplied as a print-out. In the next future we hope to be able – due to our data base and special software – to give specialized councelling on the subject of the animal selection for the breeding in such a way, that the genetic pool of the species will be preserved and the degree of inbred diminished.

Therefore all the owners and breeders of the pure-bred European bison kindly requested to be in permanent touch with us and to inform us immediately about the births, deaths and change of place of the animals as well as to send us yearly reports on the changes in the census of the possessed wisents. After having received the information on the birth of the European bison (together with its pedigree) the newborn will be immediately given its pedigree number. The information may be sent to us by mail or by fax No.(48) 885 859 12323.

During the period comprised by the registration of this issue there occurred many political changes in Europe what influenced the national status of some breeding centres. As the present issue deals with several years period, and the political changes occurred at various time, we have kept the old distribution of the breeding centres in the

former Soviet Union. However in the tables reporting the census (*World register of pure-bred European bison ...* and *List of all living European bison ...*) we have introduced the information concerning the present national status of the breeding centre and its new name if changed. The new names have also been introduced into the *Index of owners* at the end of the issue. The Editorial Office has a strong intention to get into direct touch with the breeders from Eastern Europe from the new independent countries which had belonged to the Soviet Union territory. The German breeding centres which had previously belonged to the German Democratic Republic and West Berlin were placed in the census tables in the German Federal Republic. In the tables of births and changes the national status has been described according to the date of the unification of Germany (1990.10.03).

The period of broken contacts with the Editorial Office has been probably one of the reasons of many difficulties concerning establishing of the fate of some of the European bison. Despite the enormous effort of the new Editorial Office some gap and doubts have persisted. In case of lack of the current information the breeding centres have been marked with an asterisk in the census data, and the numbers given are not precise. If the sufficient information is not quickly sent to the Editors, those owners will have to be cancelled in the next issue and the animals from these breeding centres will lose their pedigree and will not have the possibility to be introduced into the herd of pure-bred European bison. The same is true for the animals bought by the dealers who do not answer the letters sent to them by the Editors or who are unable to supply precise information regarding the fate of the wisents they are buying and selling. This clause concerns the following firms: Bayreuth, Hohenstadt and Krechting in Germany, Laval in Canada, Raillencourt-ste-Olle in France, Tokyo A. Ch. Co. and Tokyo K.B.A.T. Co. in Japan.

The development of European bison herd throughout the world has led to the new form of breeding – semi-free ranging. The animals in such breeding centres stay in large enclosures and the breeders have no possibility to identify the particular specimens, or sometimes even to establish the dates of births and deaths, and as a rule they are unable to fix the pedigree of the calves. These breeding centres will be – starting from this issue – marked by the sing ♦ and they will be transferred from the table *List of all living European bison ...* to that entitled *World register of pure-bred European bison ...* where only numeric data are presented. The condition to put such a breeding centre into the Pedigree Book is a written pledge of the breeder warranting the purity of the bred. In this issue there are three breeding centres in this position, i.e. PRESLAV and VODEN in Bulgaria and GURLEY in the USA.

In some particular cases the pure-bred European bison may loose their pedigree identification and are classified as BISON BONASUS: in the present issue this has been done regarding the animals transferred from the ZOO in Barcelona to the ZOO in Lisboa on the 1980.05.09 (*Table Additions and corrections ...*). The Barcelona ZOO has been unable to identify the animals which have been sent, but it has given a written pledge of the purity of their bred.

In the breeding practice, there occur some cases of including pure-bred European bison from the free-ranging herd registered in this Book to the enclosed breeding centres. These animals have been marked now with the graphic sign ♂ and placed in the table *Official register* ..., appropriate for the year of including. In each case of such a resettling the breeder is requested to give a written pledge confirming the purity of the bred of these animals.

The numeric data from the free-ranging herd are not always complete. In the present issue data from the BIESZCZADY breeding centre do not comprise animals which transgress the frontier and pass to Slovakia and Ukraine. In the future the international co-operation will be helpful in establishing those data.

The Editorial Office has been unable to get in touch with the new breeders to whom pure-bred European bison have been sent. These are the following centres: Belo Horizonte (Brazil), Bogota (Columbia), Circus Kaiser, Dinkelsbuhl, Harry Althoff, Stendal and Winningen (German Federal Republic), Györ and Jaszberenyi (Hungary), Ideasa (Spain).

All the persons who could help us are kindly requested to supply the Editorial Office with the addresses of these breeding centres.

Jan Raczyński

* * *

Liter rozpoznawczych używa się do tworzenia nazw żubrów urodzonych w danej hodowli. Proponowane litery rozpoznawcze hodowcy wybierają spośród dotychczas nie zastrzeżonych i przedstawiają Redakcji *Księgi Rodowodowej Żubrów* do zatwierdzenia. Duże litery zastrzeżone są wyłącznie dla nazw żubrów linii białowieskiej.

Appropriate distinctive letters are used to form names given to European bison born in a given breeding centre. Breeders should choose the distinctive letters they propose to use from among those not already reserved, and submit them to the Editors of the *European Bison Pedigree Book* for approval and acceptance. Capital letters are reserved for the names of wisents of Białowieża-line only.
